

INSTALLATION OF R126 SPIRAL LEFT HAND ON A ½" STRAIGHT SHAFT

Product No. R126

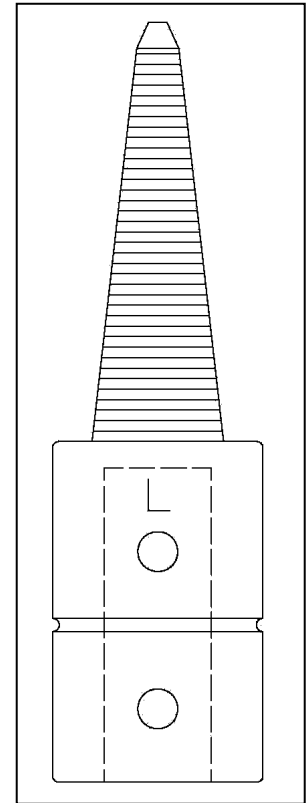

1.0 OVERVIEW

The **R126 Spiral Left Hand** is to be installed on a ½" **Straight Shaft Left Hand Side Only**.

The **R126 Spiral Left Hand** comes with (2) 10-32 X 1/4" Set Screws and (1) 3/32" Hex Wrench.

2.0 INSTALLATION

- 2.1 Unplug the power cord.
 - 2.2 Remove any object from the **Left Hand** shaft.
 - 2.3 Make sure the shaft is free from damage or rust.
 - 2.4 Make sure the **R126 Spiral Left Hand** slides freely on to the shaft. Do not force it on. If it will not go on there is damage, such as a burr or rust on the shaft. Use a file and/or emery paper (sand paper) to clean the shaft.
-
- 2.5 If you have a shaft as in **Figure 1**, you **Must File Two (2) Flat Spots** for the **Set Screws** to **Set On** or the **Set Screws Will Damage the Shaft** and you will not be able to remove the **R126 Spiral Left Hand**. Slide the **R126 Spiral Left Hand** onto the shaft and gently tighten the **Set Screws** to make marks on the shaft. File flats on the shaft where the **Set Screws** made the marks.
-
- 3.0 If you have a shaft as in **Figure 2**, slide the **R126 Spiral Left Hand** onto the shaft and tighten the two (2) **Set Screws** onto the flat of the shaft.
